

Mastering the Assessment Companion

A Learner's Journey to Reliable
Generative AI Context Engineering.

v0.6.1-rc.3 | 5 Chapters | 120 Verified Questions

Setting Expectations: The Rules of Engagement

The Reality

Self-Study Reinforcement

An active learning tool to test and improve judgment.

Local Browser Storage

Progress is saved strictly on your current device and browser.

Deterministic Browser Scoring

Calculated locally upon submission. No external analytics.

A Book Companion

Reinforces the text. The book remains your primary source.

The Assumption

Not a Proctored Exam

No identity verification or tamper resistance.

Not Cloud Synced

Does not follow you automatically to another phone or PC.

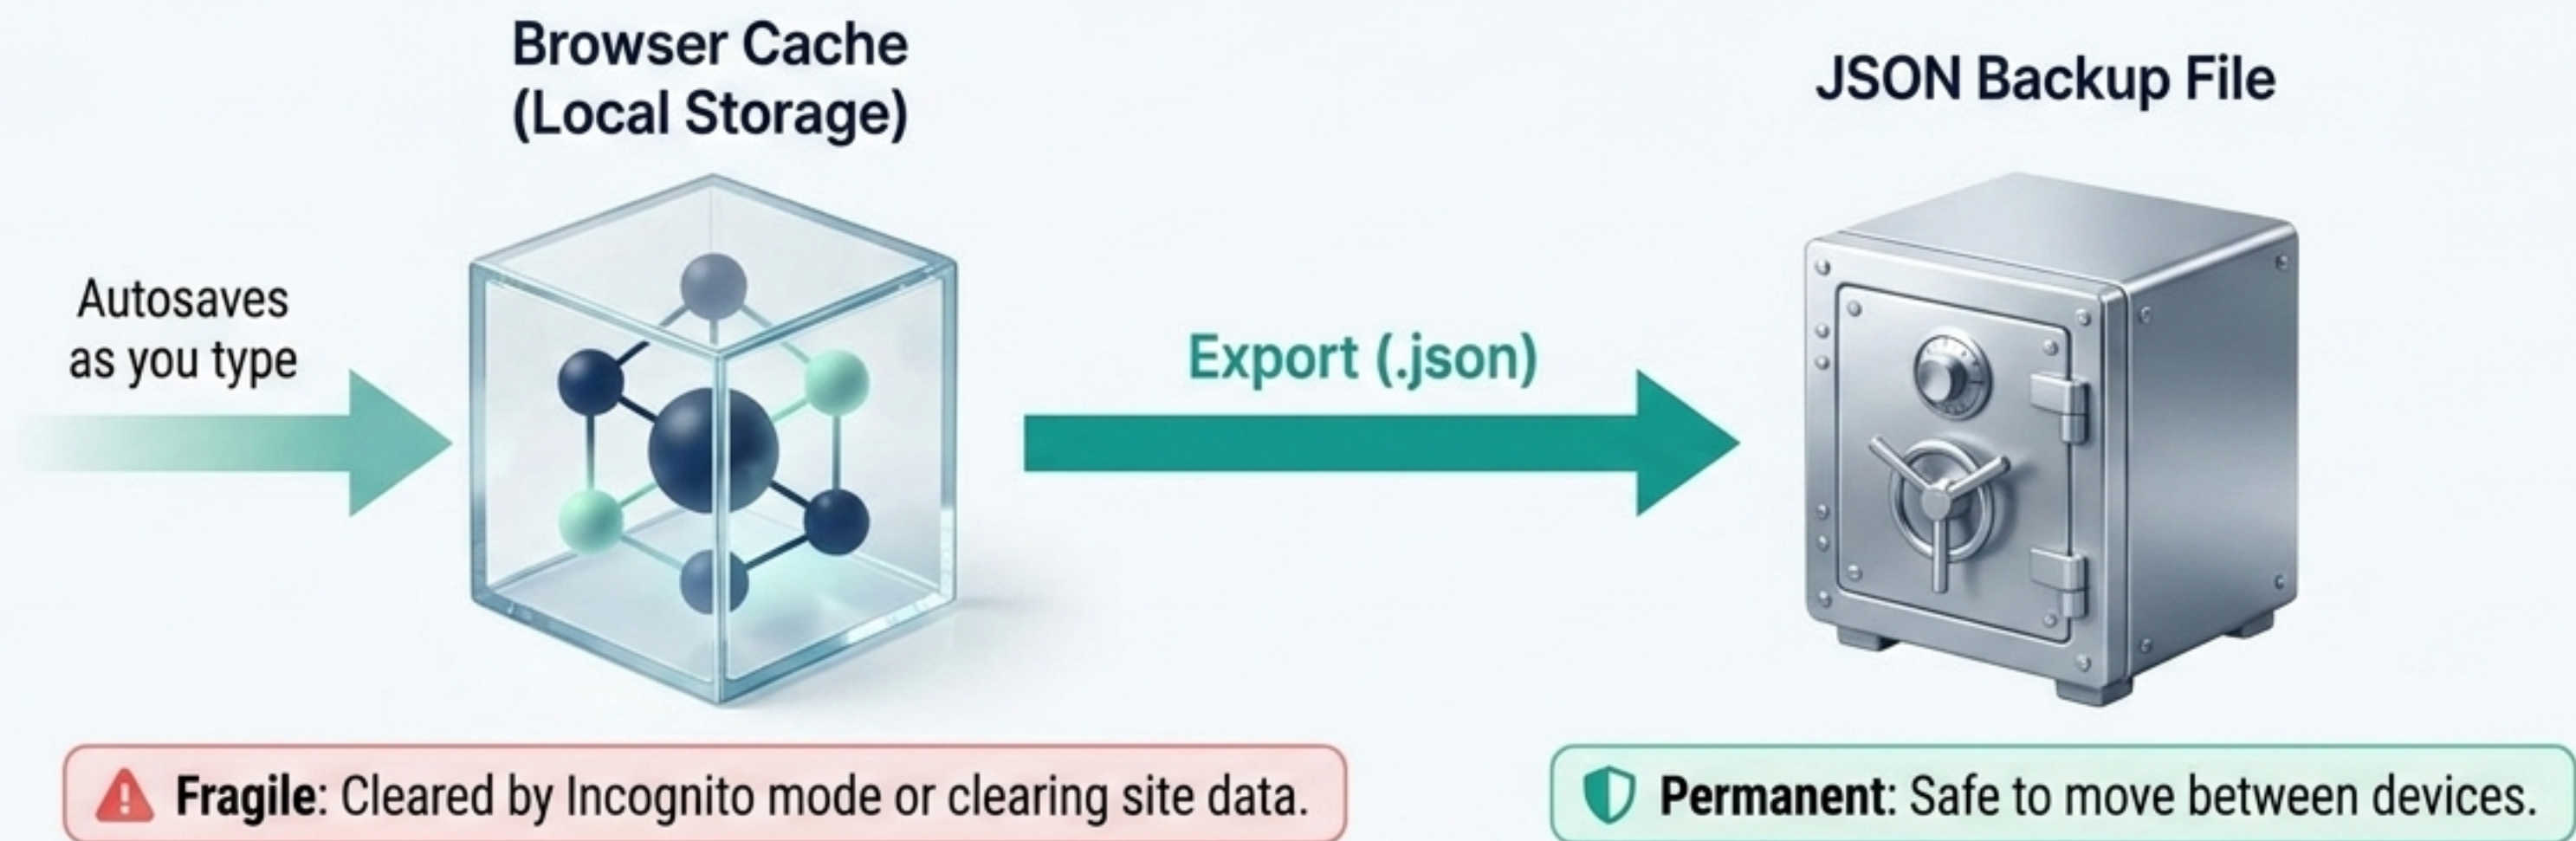

Not Server-Side

No data is uploaded or tracked remotely.

Not a Book Replacement

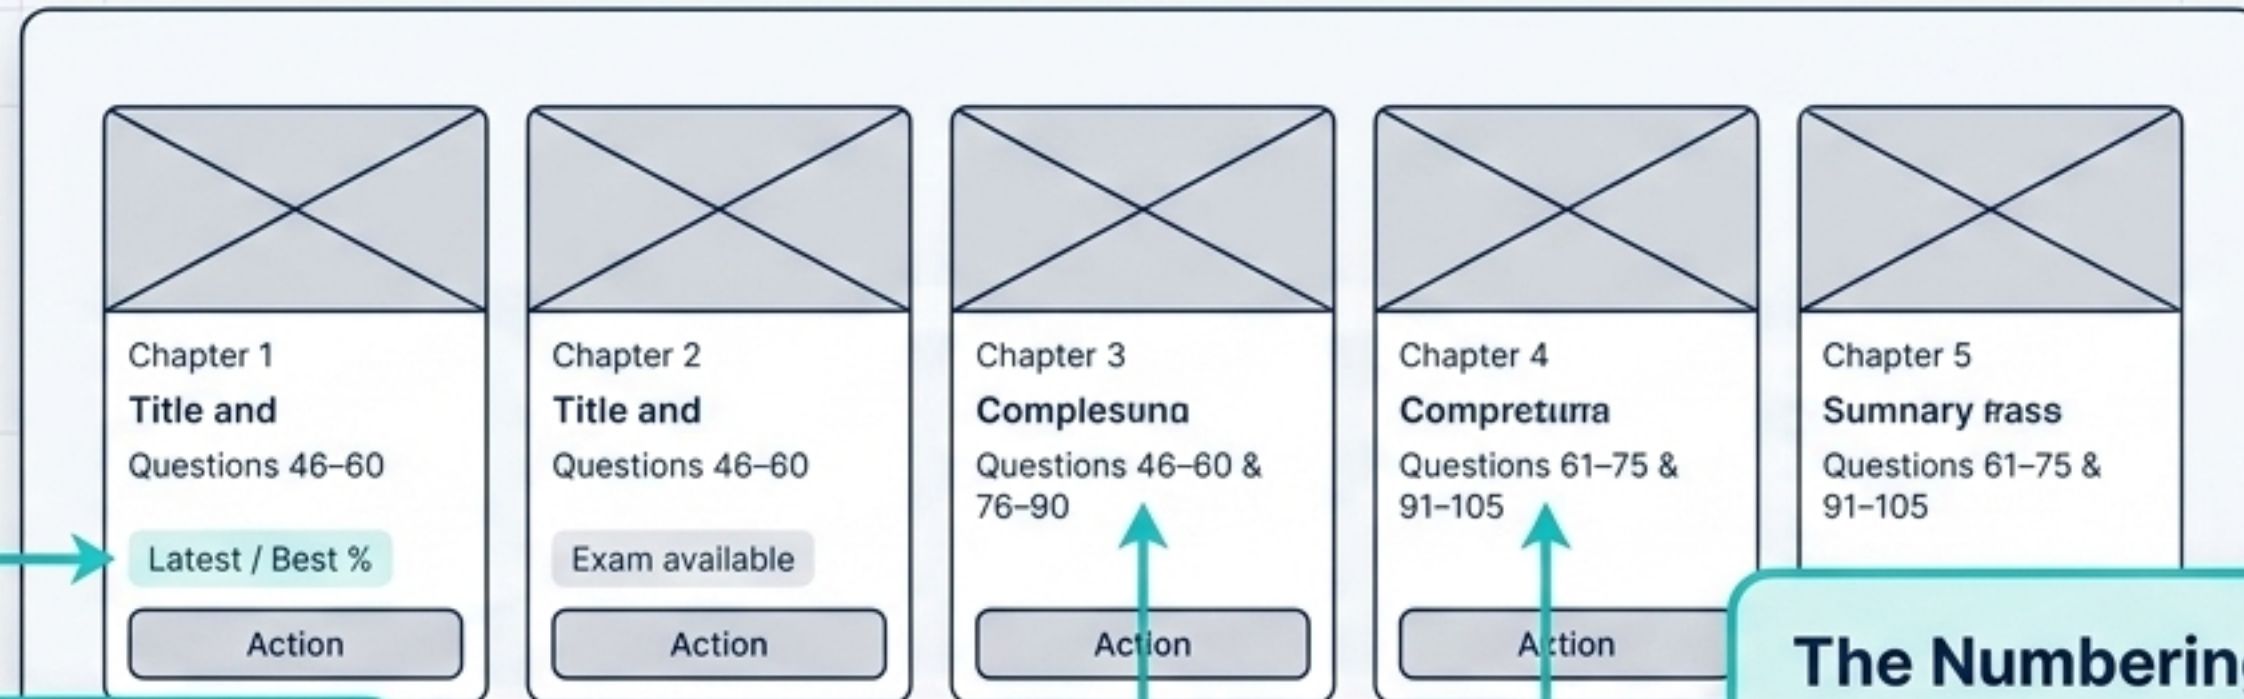

Requires reading the actual source material.

Where Your Data Lives

Launch Requirements	Core Rule
Run locally on Windows 11 via <code>start-server.bat</code> (Terminal remains open, ports 4173–4183) or use a hosted web address.	Always use a standard browser window. Progress belongs exclusively to that specific browser and device until exported.

Decoding the Dashboard

Status Badges

Shows at-a-glance readiness: "Exam available", "Resume exam", or a completed "Latest / Best %".

The Numbering Anomaly

Chapter 3: Questions 46–60 & 76–90
Chapter 4: Questions 61–75 & 91–105

Intentional Interleaving: No questions are missing; the source book interleaves these ranges.

Active Test-Taking & The Question Map

Question...

☐ Choice 1

☐ Choice 2

☐ Choice 3

☐ Choice 4

autosave
Draft Saved Automatically ✓

Save and exit exam

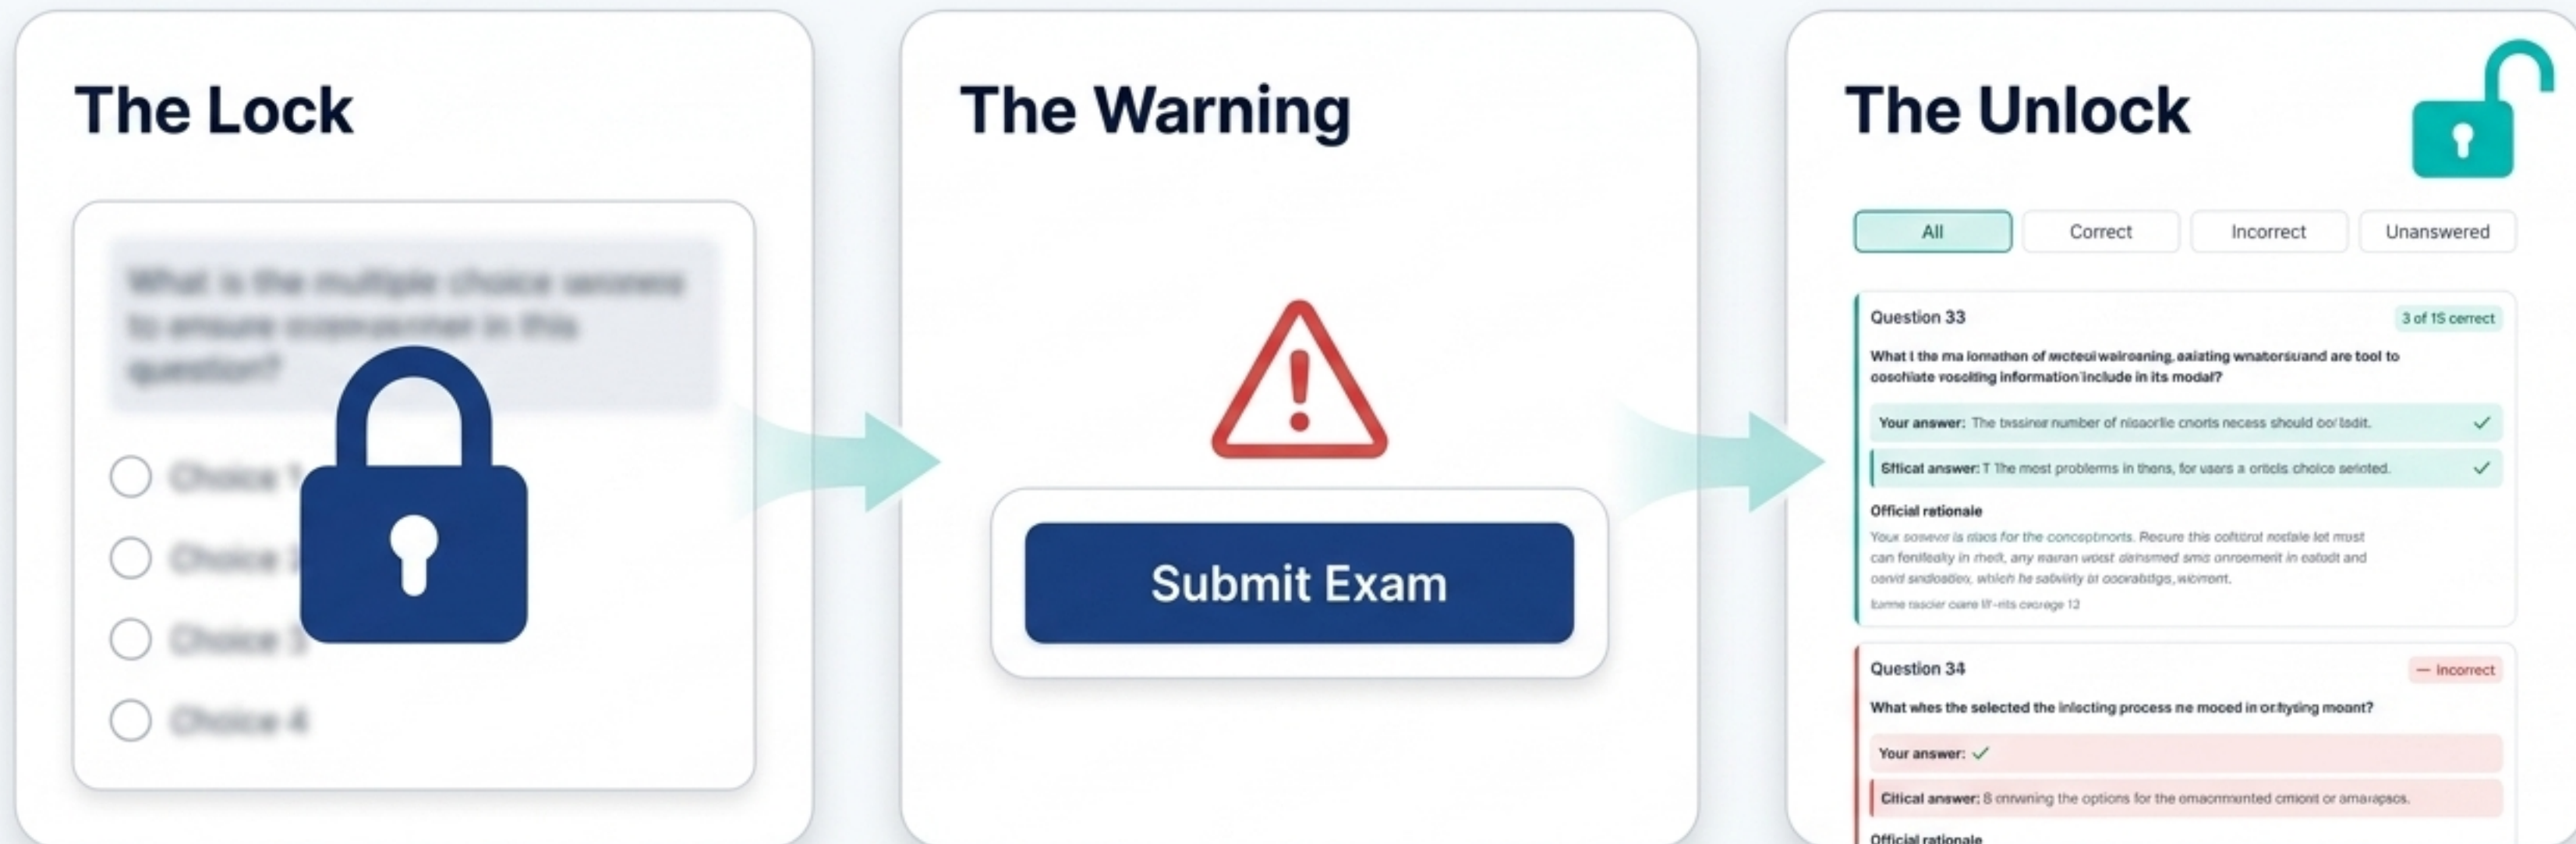

Read the question and all four choices. Tapping a card instantly replaces the saved draft. Private tabs destroy this draft when closed.

-  **Answered:**
Saved securely in the browser.
-  **Unanswered:**
Can be skipped and returned to later.
-  **Current Position:**
Your active location.

Non-Linear Study: Use the Question map to jump between items without losing your place.

The Rationale Unlocking Mechanism

Correct answers and official rationales are strictly hidden during the draft phase to ensure honest active recall.

Submitting finalizes the draft. Any unanswered questions on the map are permanently scored as incorrect for that attempt.

Submission converts the draft into a **Completed Attempt**, revealing the official rationale to explain why distractors are weaker.

Interpreting Your Progress: The Score Diagnostic

Latest Chapter Score

Calculation: Percentage of correct answers on the most recent submission.

What it measures: Current performance and readiness today.

Best Chapter Score

Calculation: The highest retained percentage in the chapter's local history.

What it measures: Your historical peak performance (ties favor the more recent attempt).

Question-Weighted Latest Score (Global)

Calculation: Total correct answers from all latest attempts divided by total questions in those attempts.

Why it matters: Chapters have unequal lengths (15 vs 30 questions). Question-weighting ensures every single question carries equal influence, preventing short chapters from skewing the whole-book average.

Safeguarding Your Journey

Exporting Progress

- **Action:** Download the .json file from the Backup page.
- **Contents:** Saves unfinished drafts, completed attempts, score history, and version metadata. No account data is included.

Restoring Progress

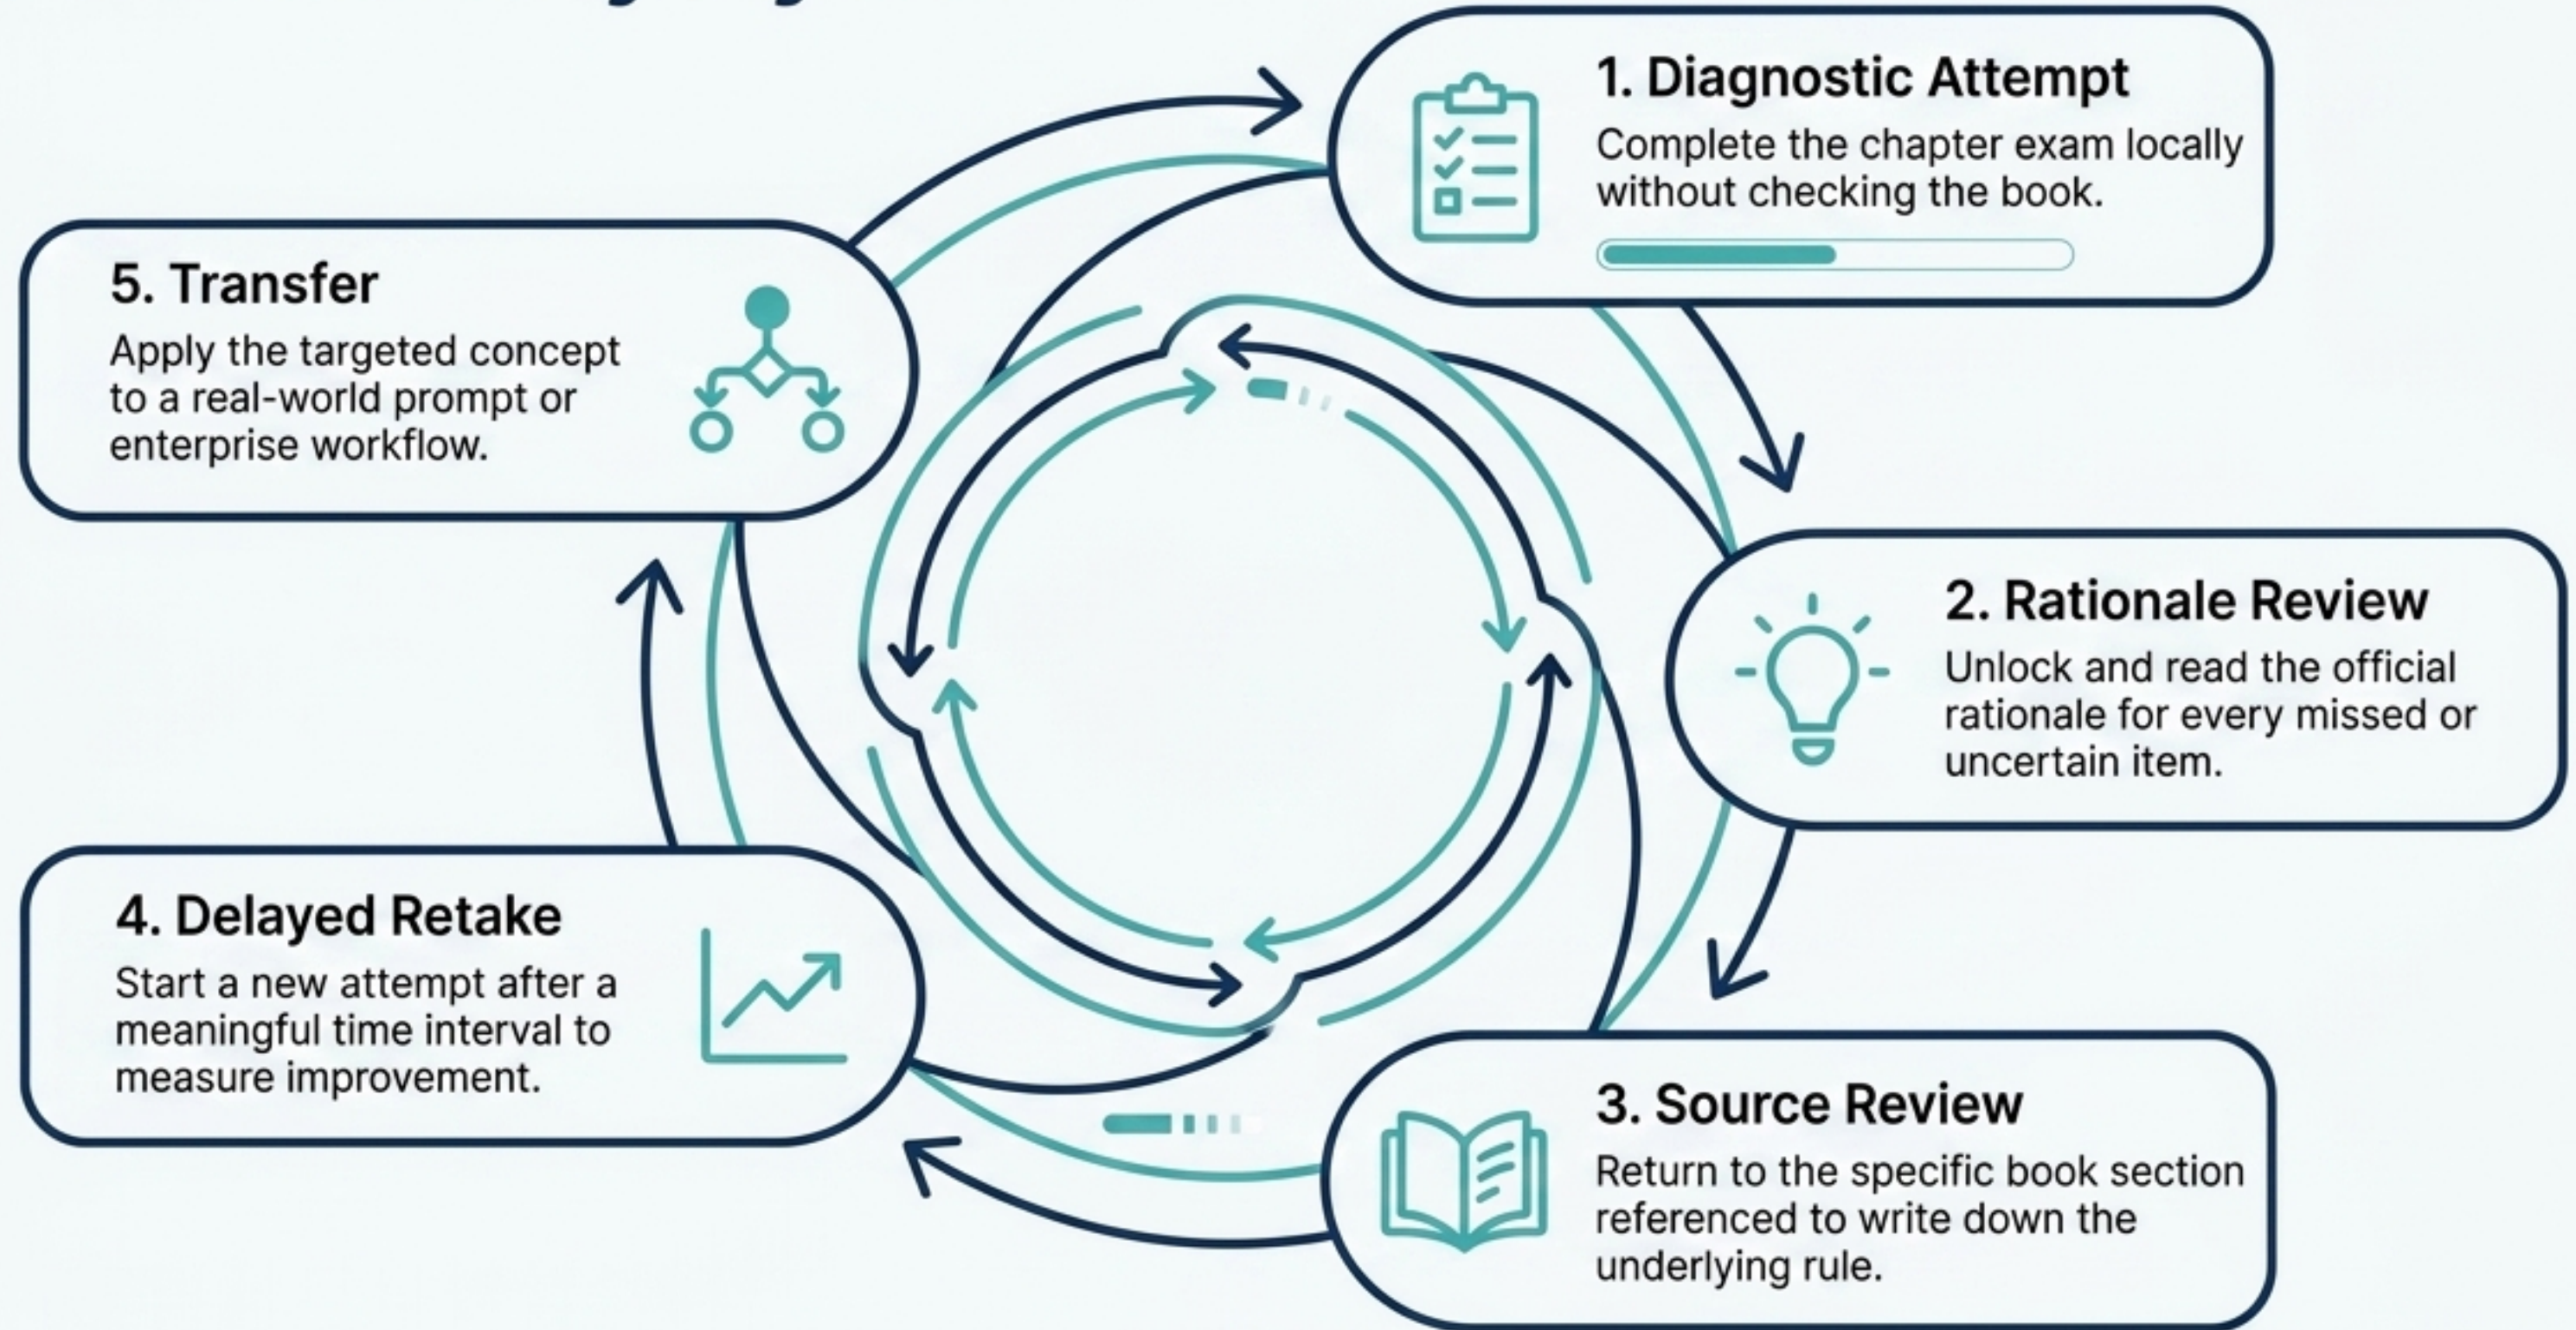

- **Action:** Upload a previously exported .json file.
- App validates schema, versions, and duplicate attempts.

WARNING: Restore is a Replacement, Not a Merge.

Importing a validated backup **completely overwrites** the existing progress record in the current browser. Always verify the preview counts before confirming.

The 5-Part Study Cycle

Core Takeaway: Repeated clicking produces history. Deliberate, delayed review produces durable learning. The goal is improved judgment—not merely a higher percentage.
